LIFE IS ALWAYS UNFOLDING THINGS FOR OUR HIGHEST GOOD!
-- *it would be great for us to learn and accept that*

We seldom think -- most of our responses are from our conditioning
-- *thinking is hard work -- but the rewards of thinking are invaluable*

If we have a problem -- we have a conflict
-- *solution to the problem lies in resolving the conflict*

Nature gives us what we need -- not necessarily what we want
-- *and we ought to be thankful for it!*

Learning ought to be fun, enjoyable, and playful
-- *in environment that is: leading, energizing, actualizing, rewarding, & nurturin g*

Nature is empowering
-- *if I think I can, or if I think I can't ... I am right!*
