LIFE IS ALWAYS UNFOLDING THINGS FOR OUR HIGHEST GOOD!
-- it would be great for us to learn and accept that

We seldom think -- most of our responses are from our conditioning
-- thinking is hard work -- but the rewards of thinking are invaluable

If we have a problem -- we have a conflict
-- solution to the problem lies in resolving the conflict

Nature gives us what we need -- not necessarily what we want
-- and we ought to be thankful for it!

Learning ought to be fun, enjoyable, and playful
-- in environment that is: leading, energizing, actualizing, rewarding, & nurturin g

Nature is empowering
-- if I think I can, or if I think I can't ... I am right!
